

## Report (communication)

As there is mentioned in Chair's report, our website provides the main vehicle for EFTRE communications. We have also group in Facebook and accounts both in Twitter and Instagram. In Eftre's Facebook group we have 174 members (in August 2019). Executive board hopes that all the members and friends of Eftre will promote the group for sharing ideas and promoting interesting events in RE area. Outi Raunio-Hannula is managing the website and the accounts in social media.

As there is written in EFTRE's web site EFTRE wants to encourage individual teachers of RE, institutions, universities etc. to get to know each other, developing some collaborative projects or setting up educational visits for students or teachers. In our FB-group you can find contacts and share your ideas. We would be very grateful if members and friends of Eftre had some suggestions of how it might be possible to work together or provide suggestions of interesting places to visit or information about previous or existing projects we can share on our web site. You can send them [eftre.net](mailto:eftre.net)
